

Long Row Primary School is affiliated to Amber Valley School Sport Partnership who provide a range of services and opportunities to support our school's delivery of PE, School Sport and Physical Activity.

Through our affiliation we are able to access PE planning resources for each year group themed around 6 different skills set for different sports. The plans are high quality and easy to follow allowing for staff to plan lessons to suit our school's facilities and students. Each lesson includes fun, progressive activities from an effective warm-up to a competitive activity with the chance to differentiate learning to support students who are high/low achievers.

Lessons also include technical and tactical teaching points allowing staff to challenge students in a variety of ways. The PE lesson planning we use also includes a PE assessment tracker giving staff the chance to efficiently assess students as Emerging, Expected or Exceeding from a physical, social and emotional standpoint.

Our affiliation package also includes a large number of inter-school events and competitions in a wide variety of sports. These events are categorised to encourage as many students as possible to represent their school throughout a given year and to help our staff select appropriate students to take part. Our students love taking part in these events and are always really excited to represent their school!

Through our affiliation we are also able to access Bikeability training which gives many of our students a chance to learn a vital life skill and increase their confidence on their bike as well as earning badges and certificates.

We also access various activity resources to implement in school, the most useful of which is the Sports Leaders resource. This, along with CPD training and the annual student conference, helps to put in place a culture of junior leadership during lunchtime and throughout the school day. This sees our older pupils leading a variety of games, providing further opportunities for pupils to be active.

Through our work with Amber Valley School Sport Partnership our staff enjoy regular staff CPD and best practice sharing, support with PE assessment and data collection, assistance with running intra-school competitions and sports days and even guidance when applying for awards and accreditation giving the school chance to help our students become more active and achieve accreditation based on our good work.
